

A MOBILE FIRE ATTACK PLATFORM FOR EXTREME HYDROCARBON FIRES

Built around the JETEX SGT Two-Phase Firefighting Stream

Dedicated high-intensity attack platform for large hydrocarbon fires

BUILT FOR

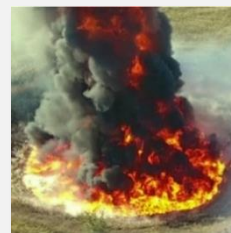

- tank farms
- refineries & petrochemical plants
- fuel terminals
- marine & port facilities
- offshore platforms

WHAT MAKES IT DIFFERENT

- JETEX two-phase firefighting stream
- Water, foam and compressed air combined into one high-energy attack stream
- Designed to deliver rapid cooling, knockdown and foam application at extended reach

PROVEN FIRE TEST RESULTS

4-ton fuel fire suppressed in **40 s**

20-ton fuel fire suppressed in **170 s**
